

CAPSULES

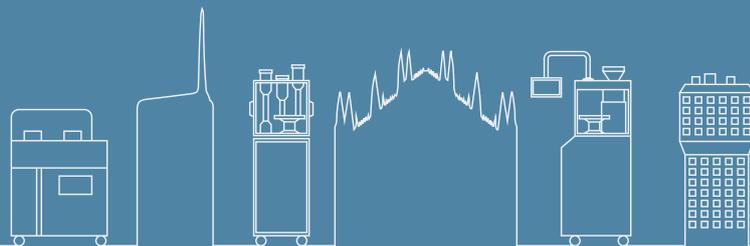

Founded in 1946 by pharmacist Aldo Augusto Bonapace, the company DOTT. BONAPACE was born as a trading company for the export of essential pharmaceutical substances. The company later specialised in the production of machines for research laboratories, focusing its sales activities worldwide.

At the turn of the century, DOTT. BONAPACE had more than 5,000 customers in over 60 countries around the world, including major pharmaceutical companies, various pharmaceutical, nutraceutical and herbal laboratories, as well as hospitals and private pharmacies.

In 2017, the fourth generation of the Bonapace family handed over the baton to a few collaborators who took over the entire ownership and embraced the same philosophy, kept the historical company name and laid the foundations for a new development policy. The new team was strengthened and invested in more spacious, modern and functional facilities.

In 2021 DOTT. BONAPACE became part of the MARCHESINI GROUP.

An Italian history of innovation in Pharma Solutions

01 CAPSULES

CAPSULE FILLING

IN-CAP SE

Automatic capsule filling machine with dosing devices for powders, pellets, single tablets, mini-tablets, capsule in capsule, liquids.
